Our Mica Chandeliers provide a romantic warm light, which creates a wonderful mood for any room. The rim of the mica is leaded in order to add strength and durability, along with providing an aesthetic conclusion to the natural beauty of mica. The fixture is created using a golden mica that blends perfectly with the hand forged iron frame and decorative pine cones and needles.

Naytura's mica chandelier is available in a variety of sizes to fit any type of room. These fixtures are perfectly complimented with Naytura's mica sconces. Choose from pine or aspen detailing to match the natural surroundings of your project and experience the romantic qualities that only mica can provide.
